SUMMARY

Software Engineer with 7+ years of experience in full-stack development in Javascript, React, and NodeJS.

EXPERIENCE

Software Engineer III July 2024 – Present
OpenGov *Dallas, TX*

- Served as tech lead for a squad of 5 engineers, in a broader Procurement product team of 30 engineers
- Built software for government agencies to request, solicit, evaluate, and award vendor contracts
- Collaborated with PMs (product managers) by reviewing and clarifying their PRDs (Product Requirements), and in turn providing them with engineering timeline estimates using WBS and PERT frameworks
- Migrated legacy user management and role-based access control (RBAC) systems to OpenGov platform
- Designed scalable microservice for custom fields on arbitrary documents, including schema snapshots
- Ran a weekly engineering office hours meeting with about 20 attendees per week, reviewing design docs and troubleshooting common developer experience issues
- Improved API documentation quality by generating docs from source code and using semantic versioning
- Regularly monitored production out-of-memory alerts to discover and fix unpaginated API endpoints

Senior Software Engineer August 2018 – July 2024
Qualtrics *Seattle, WA*

- Maintained website Customer Success Hub that allowed users to create Qualtrics technical support tickets
- Introduced AI chatbot that gave users a chance to self-triage issues before they could open a support ticket, which reduced amount of tickets taken per support agent by about 60%
- Improved non-English localized string quality by introducing variable and HTML templating
- Migrated statistical models from a single machine to a job cluster, saving $50k/yr in dedicated hardware costs
- Drastically reduced page load times by 95% by removing unnecessary build dependencies from client bundle

PERSONAL PROJECTS

dallas-alerts, available on GitHub

- Created a Mastodon bot that polls open City of Dallas data and posts details of active incidents
- Followers are notified within 1 minute of an active police incident
- Reduced redundant HTTP request traffic to Mastodon by 95% by adding a Redis cache

TECHNICAL SKILLS

Languages	Javascript, Typescript, PHP
JS Frameworks	React, Redux, Redux Form, Express, Koa, NestJS, Vite, Webpack, Material UI
Test Frameworks	Jest, Vitest, Playwright, Mocha, Selenium
Backend	NodeJS, MongoDB, Sequelize, Prisma, Postgres, Kafka, Redis (Valkey), AWS
Tools	Git, Linux, Docker, Jenkins, GitHub Actions, Splunk, Grafana, Jira, Confluence, Aha

EDUCATION

B.S. in Computer Science and B.A. in Linguistics August 2014 – May 2018
University of Texas at Austin GPA: 4.0
